Apar Mistry  
Robert Wyatt  
Shinjin Santhakumar  
Shawn-Michael Kern

#### Features to implement in the Next Sprint:

- As a developer, I would like to be able to run the unit tests for all functions.
- As a developer, I would like to reduce redundancy throughout the program.
- As a developer, I would like to see more documentation detailing what the program does.

#### User Test Cases:

- Ensure that nothing breaks when running tests

#### Tasks completed from Last Sprint:

- ❖ Incremental Analytics : Count Projects
  - [Completed by Shinjin. Verified by everyone.]
- ❖ Incremental Analytics : Most Popular Projects Per Month
  - [Completed by Apar and Shinjin. Verified by everyone.]
- ❖ Resolution of merge branch and conflicts
  - [Completed by Shinjin. Verified by everyone.]
- ❖ List Features to be completed on Artifact
  - [Completed by Joseph. Verified by everyone.]
- ❖ List Test Cases on Artifact
  - [Completed by everyone. Verified by everyone.]
- ❖ Complete Taskboard on Artifact
  - [Completed by Shawn. Verified by everyone.]

#### Tasks to be completed in the Next Sprint:

- ❖ Ensure proper implementation of test harness
  - Acceptance criteria: All test suites can be run, and the program passes.
- ❖ Refactor existing code
  - Acceptance criteria: Every function has been examined for potential improvements, and those improvements have been peer-approved.
- ❖ Add documentation for existing code
  - Acceptance criteria: Each function has clear documentation on its purpose, use, and details.
- ❖ Add documentation for user-end installation and use of program

- Acceptance criteria: A new user can follow the directions listed and successfully run the program on their own device.
